NUVIS WHITE

Delicate hand cleansing gel

FEATURES

NUVIS WHITE is a hand soap in gel with neutral pH, highly effective on greases, oils, and any other type of dirt.

It is solvent free, but it is able to remove any type of dirt, basing its action on a mix of synthetic soaps that are extremely effective without irritating the skin.

NUVIS WHITE also contains a certain quantity of microgranules in suspension totally of natural origin and ecologically not impacting. They favour the removal and dissolution of paint and dirt, also penetrating within deep skin wrinkles, which would not be possible to reach with the product. These microgranules therefore contribute substantially to the cleaning action of the product without presenting abrasive effects, thanks to their particular composition.

NUVIS WHITE is a cosmetic product (Legislative Decree 731/86 and subsequent updates) and contains protective and softening agents for the skin, which prevent dryness and protect it.

It is a product suitable for hands involved in heavy and messy works in any workshop, but that anyhow leaves the skin soft and velvety.
